

# MISSION STATEMENT

The mission of the Roska Tamás Doctoral School of Sciences and Technology is to train new generations of scientists reaching the limits of knowledge in their research fields, who are capable actively forming academic research and innovation during their career at the service of humanity, respecting the values of the Catholic Church.

To fulfill this mission, we:

- Work to attract the most promising students and professors to the Doctoral School,
- Emphasize and promote intensive, disciplinary-specific and multidisciplinary training,
- Support academic progress and high quality scientific research of PhD students and professors,
- Continuously evaluate and improve policies, performance and the corresponding regulations of the Doctoral School,
- Keep regular dialogue with the leaders of Pázmány Péter Catholic University (PPKE) and the Faculty of Information Technology and Bionics (PPKE-ITK) on strategic and ethical issues.
