

VISION

The Roska Tamás Doctoral School of Sciences and Technology (Doctoral School) offers a unique and high quality multidisciplinary doctoral education for Hungarian and international students, exploiting and strengthening the convergence between engineering sciences and quantitative natural sciences with new scientific results. The Doctoral School is highly recognized in Hungary and Europe for the scientific contributions of its PhD students and professors, as well as for the outstanding professional performance and community service of its PhD graduates. The Doctoral School maintains close links with national and international research institutions, universities and companies, which further enhance the quality of doctoral training through their infrastructure and teaching capacity.
