

A significant number of Stipendium Hungaricum applications arrived to our Faculty

- The education policy objective of the Stipendium Hungaricum program is to promote internationalization and quality improvement in Hungarian higher education, strengthen the international relations of the Hungarian scientific elite, increase the cultural diversity of higher education institutions and promote the competitiveness of Hungarian higher education worldwide. We have received 30/14, 36/9, and 47/5 Stipendium Hungaricum scholarship applications for the Computer Engineering and Info- Bionics Master programs in the first, second and third place, respectively, to the 10-10 available places in our Faculty for the academic year 2016/2017.
